HIKMAH YOUSUPH

SOFTWARE ENGINEER

Experienced Software Engineer with expertise in frontend and backend development. Strong problem-solving abilities and a passion for delivering high-quality code.

WORK EXPERIENCE

Web Developer | Filly Coder | Sep 2022 – May 2023
- Proficiently implemented responsive websites using JavaScript and its frameworks.
- Successfully developed complex web-based applications and effectively integrated them with various APIs, such as YouTube and Instagram.
- Built customized, compatible client dashboards based on provided data.
- Demonstrated expertise in building calendars with input masking and validation capabilities for both single-date and date-range options.

Tech Writer | LD Talents | Feb 2022 – Mar 2022
- Implemented responsive websites from static designs.
- Wrote step-by-step tutorials on various aspects of front-end development.
- Ensured SEO-friendly articles to enhance online visibility.

PROJECTS

Sneakers | GitHub   View Live
- Created and designed an e-commerce application using MERN stack and Figma respectively.
- Implemented login, and signup, displaying a variety of sneakers to choose from and filter through, and integrated Stripe API for payment.
- Enabled user info, password, and cart update, user address creation and default setting, and user order history review.
- **Stack Used** - HTML/CSS/JavaScript, React/Redux, MongoDB, Node, Express, Stripe API, Framer Motion, Tailwind.

**Lendsqr** | GitHub   View Live
- Created a front-end app using a mockAPI integration. Used the API to get, filter, search, and paginate through users.
- Displayed details about a user when their link is clicked.
- Allowed update of a user's status to active or blacklisted using localStorage.
- **Stack Used** - HTML/CSS/JavaScript, TypeScript, React, Redux, SCSS, API.

LearnWell | GitHub
- Building a full-stack application (in progress), designed with Figma and developed for mobile using React Native. Planning to create the website using React after completing the mobile app.
- Refactored the backend code from Node.js Express.js to Django in another branch. Creating a learning app for users to explore various subjects and topics, with video tutorials from YouTube included for each topic.
- Allowing users to test their knowledge with a quiz at the end of every topic and to create personal notes based on what they learned.
- **Stack Used** (in progress) - HTML/CSS/TypeScript, Figma, React, React Native, Tailwind, React/Redux, MongoDB, Node, Express, Python, Django, Firebase.

TECHNICAL SKILLS/TOOLS

Frontend/Design
- HTML
- CSS
- JavaScript
- TypeScript
- ES6
- React
- React Native
- Next.js
- Redux
- Tailwind CSS
- Bootstrap
- SASS/SCSS
- Figma

Backend
- Node JS
- Express JS
- MongoDB
- Python
- Django

Platforms/Tools
- Git/GitHub
- API integration
- VsCode
- Postman

EDUCATION

Hack Code Camp | Python Language
University of Ilorin | B. Sc Physiology
